

User's Manual for OVERFLOW 2.4

**Version 2.4
July 2022**

**Robert H. Nichols
University of Alabama, Birmingham
Birmingham, AL 35294**

**Pieter G. Buning
NASA Langley Research Center
Hampton, VA 23681**

Table of Contents

1. Introduction

- 1.1 Code History**
- 1.2 OVERFLOW 2.4 Capabilities**
- 1.3 Navier-Stokes Equation Implicit Solution Procedure**
- 1.4 Low-Mach Number Preconditioning**
- 1.5 Species Equations**
- 1.6 Non-Dimensional Flow Variables**
- References**

2. Requesting and Compiling OVERFLOW 2.4

- 2.1 Obtaining OVERFLOW 2.4**
- 2.2 Compiling OVERFLOW 2.4**
- 2.3 Recommended Companion Software**
- 2.4 OVERFLOW Mailing List**
- References**

3. OVERFLOW-Mode Operation

- 3.1 Required Input Files**
- 3.2 Force/Moment Integration**
- 3.3 NAMELIST Inputs**
- 3.4 Turbulence Model Specifications**
- 3.5 Variable γ and Multispecies**
- 3.6 Boundary Condition Specification**
- 3.7 Unsteady Flow Output Options**
- 3.8 Initializing the Solution**
- 3.9 Running the Code**
- 3.10 Test Cases**
- References**

4. OVERFLOW-D-Mode Operation Without Grid Movement

- 4.1 Near-Body Grid Generation**
- 4.2 Off-Body Grid Generation**
- 4.3 X-Ray Specification**
- 4.4 Grid Assembly using DCF**
- 4.5 Grid Adaptation to Solution Error**
- References**

5. OVERFLOW-D-Mode Operation With Grid Movement

- 5.1 Body Motion Non-Dimensionalization**
- 5.2 Six-Degree-of-Freedom Motion Using &SIXINP**
- 5.3 GMP XML Specification**
- 5.4 GMP Prescribed Motion**
- 5.5 GMP 6-DOF Motion**
- 5.6 Using overgrid to Preview GMP Body Motion**

- 5.7 Simulating Body Collisions**
- 5.8 Moving-Body Output Files**
- 5.9 Grid Adaptation to Body Motion**
- References**

6. Debugging Tools

- 6.1 Turbulence Model Diagnostics (DEBUG=1)**
- 6.2 Time Step Diagnostics (DEBUG=2)**
- 6.3 Residual Diagnostics (DEBUG=3)**
- 6.4 Solution Adaption Information (DEBUG=4)**
- 6.5 Reynolds Stress Turbulence Model Diagnostics (DEBUG=5)**

7. Utility Codes

Appendix A. File Formats

Appendix B. NAMELIST Input

Appendix C. Boundary Condition Types

Appendix D. Viscous Region Specification

Appendix E. Rotorcraft Simulations (future)
